

# Installation

## Owner Provided Towel Dispenser

### Model 2A09 & 2A95

- Check local codes and standards for proper mounting height of towel dispenser.
- Only roll towel units with bottom hinged covers will work properly with this unit.

Note: Model 2A09 not shown.

Secure towel dispenser to back of Diplomat unit using (4) ½" long self tapping screws (installer provided) at any of the (8) cage nut or ⅝" pre-drilled hole locations.

- Cage nuts and pre-drilled holes in high-hat will accommodate a wide variety of towel dispensers. If user provided dispenser does not match any of these fastening locations, new ⅝" holes will need to be drilled. Towel dispenser should be secured to the unit using ½" long self tapping screws.
- It is important to mount the dispenser so that a small portion of bottom of towel dispenser is visible to user.
